

## NETZERO.KIWI LIMITED compliance disclosure

<b>Claim</b>	CO2 sequestration via soil carbon increase.
<b>Voluntary action undertaken (where/what/why)</b>	Soil management resulting in measurable soil carbon increase.
<b>Does this action contribute to helping a country meet its climate change targets or does it go beyond a country level target?</b>	It goes beyond a country level target.
<b>How is this action additional to compliance, policy or mandatory obligations and how does it go beyond your business-as-usual activities?</b>	<p>This action is not required by compliance, policy or mandatory obligations.</p> <p>Soil management is directed at increasing soil carbon levels.</p>
<b>How is the voluntary action measured and verified?</b>	Soil samples are lab tested. Results and calculations are published on a public registry.
<b>How is double usage prevented?</b>	Double usage is prevented by verifying land ownership, contractual obligations, opt-out solutions and publicly verifiable unit cancellation.
<b>How is permanence assured?</b>	Permanence is assured by published CO2 sequestration data and by contractual obligations that restrict land use changes.
<b>How is leakage addressed?</b>	The activity of reducing or removing emissions within the boundary of the voluntary climate change mitigation activity does not result in increases to emissions elsewhere.
